Walter E. Younkin and Harvey E. Martens 566–571 Long-term Success of Seeded Species and Their Influence on Native Species Invasion at Abandoned Rig Site A-01, Caribou Hills, N.W.T., Canada

Charles L. Elliott, Jay D. McKendrick, and Dot Helm 572–577 Plant Biomass, Cover, and Survival of Species Used for Stripmine Reclamation in South-central Alaska, U.S.A.

Contents and Index for Vol. 19, 1987 579–588

SUBJECT AND AUTHOR INDEX FOR VOL. 19, 1987

Ablation, 71–80
Acetylene reduction, 432–436
Acharya, S. N. *See* Hermesh, R. and Achayra, S. N.
Ackroyd, P. (Erosion by snow avalanche and implications for geomorphic stability, Torlesse Range, New Zealand), 65–70
Adaptive traits in arctic plants, 357–365
Afforestation, 526–529
Alaska: Effect of road dust, 479–489; Habitat restoration, 537–543; Paleoenvironment, 230–241; Reclamation, 530–536, 572–577; Revegetation, 29–34, 544–548, 554–565; Succession, 554–565; Tundra wildfire, 461–469; Vegetation recovery, 442–450, 461–469; Wetlands, 209–229
Alaskan Arctic Coastal Plain, 442–450
Allen, E. B., Chambers, J. C., Connor, K. F., Allen, M. F., and Brown, R. W. (Natural reestablishment of mycorrhizae in disturbed alpine ecosystems), 11–20
Allen, M. F. *See* Allen, E. B., et al.
Alpine: Ecosystem, 11–20; Frost heave, 155–166; Habitat use, 313–320; Photosynthesis, 21–27; Phytogeography, 242–251; Reproductive response of *Poa*, 321–326; Revegetation, 544–548; Surface irradiance, 270–278; Tundra energy balance, 261–269; UV-B radiation, 21–27; Vegetation, 1–10
Andes, 135–153
Antarctica: Radiation flux, 71–80
Anthus spinoletta, 313–320
Aradóttir, A. L. *See* Arnalds, O., et al.
Arctic: Dust effects, 479–489; Economic development, 345–350, 351–356; Floras, 357–356; Geography, 345–350, 351–356; Indigenous peoples, 351–356; Kane Basin surface sediments, 89–94; Landscape ecology, 414–424; Limnology, 305–312; Phytosynthesis, 21–27; Plant establishment, 357–365; Plant growth, 357–365; Plant reproduction, 357–365; Protalus ramparts, 167–174; Reclamation, 530–536; Revegetation, 549–553; 566–571; Soil erosion, 498–507; Succession, 373–384; Tundra restoration, 366–372; UV-B radiation, 21–27; Vegetation recovery, 442–450, 451–460, 490–497
Arnalds, A. (Ecosystem disturbance in Iceland), 508–513
Arnalds, O., Aradóttir, A. L., and Thorsteinsson, I. (The nature and restoration of denuded areas in Iceland), 518–525
Arnfield, A. J. (A Fourier series approach to skyline generalization for surface irradiance estimates in alpine terrain), 270–278
Arthropod, 313–320
Atmospheric pollution, 189–193
Avalanche debris, 167–174
Avalanche. *See also* Snow avalanche

Ballantyne, C. K. (Some observations on the morphology and sedimentology of two protalus ramparts, Lyngen, northern Norway), 167–174
Barnes, P. W., Flint, S. D., and Caldwell, M. M. (Photosynthesis damage and protective pigments in plants from a latitudinal arctic/alpine gradient exposed to supplemental UV-B radiation in the field), 21–27
Beetles, 230–241
Beget, J. (Low profile of the northwest Laurentide Ice Sheet), 81–88
Bentley, C. V. *See* Scott, P. A., et al.
Billings, W. D. (Constraints to plant growth, reproduction, and establishment in arctic environments), 357–365
Bisson, M. *See* Ouellet, M., et al.
Blöndal, S. (Afforestation and reforestation in Iceland), 526–529
Blue-green algae, 432–436
Bog islands, 402–413
Book Reviews
Antarctic Ecology. R. M. Laws. *V. Komárková*, 95
Dynamics of Ice Cover. L. A. Timokhov. *W. Stringer*, 100
Flora and Fauna of Alpine Australasia: Ages and Origins. B. A. Barlow. *V. Markgraf*, 330

Brown, R. W. *See* Allen, E. B., et al.

Caldwell, M. M. *See* Barnes, P. W., et al.
Calluna, 396–401
Canada: Arctic limnology, 305–312; Late Wisconsin Ice Sheet, 109–126; Laurentide Ice Sheet, 81–88; Revegetation, 451–460, 566–571; Riparian vegetation, 35–43; Rocky Mountains, frost heave, 155–166; Subarctic freeze-thaw, 289–295; Treeline at Churchill, 45–51, 175–185
Cargill, S. M. and Chapin, F. S., III (Application of successional theory to tundra restoration: a review), 366–372
Caseldine, C. J. (Neoglacial glacier variations in northern Iceland: examples for the Eyjafjördur area), 296–304
Chambers, J. C. *See* Allen, E. B., et al.
Chapin, F. S., III. *See* Cargill, S. M. and Chapin, F. S., III
Chinn, T. J. H. (Accelerated ablation at a glacier ice-cliff margin, Dry Valleys, Antarctica), 71–80
Circumpolar lands, 351–356
Climatic change, 45–51
Collins, W. B. *See* Helm, D. J., et al.
Colorado: Alpine tundra energy balance, 261–269; Alpine turbulent transfer, 261–269; Alpine vegetation, 1–10
Comité Arctique International Seventh Conference, 333–577
Conifer forests, 252–260
Connor, K. F. *See* Allen, E. B., et al.
Crown form, 175–186
Cummins, R. P. *See* Miller, G. R. and Cummins, R. P.
Cushion plants, 135–153
Cyanobacteria, 432–436

Dalton Highway, 479–489
Deglaciation chronology, 109–126
Densmore, R. V. and Holmes, K. W. (Assisted revegetation in Denali National Park, Alaska, U.S.A.), 544–548
Densmore, R. V., Neiland, B. J., Zasada, J. C., and Masters, M. A. (Planting of willow for moose habitat restoration on the North Slope of Alaska, U.S.A.), 537–543
Denuded areas, 518–525
Diatoms, 89–94
Dickman, M. *See* Ouellet, M., et al.
Dinitrogen fixation, 432–436
Disturbance, 11–20, 29–34, 442–450, 451–460, 470–478
Disturbed ground, 396–401
Disturbed sites, 554–565
Divergence in conifer forests, 252–260
Douglas, D. A. (Growth of *Salix setchelliana* on a Kluane River point bar, Yukon Territory, Canada), 35–43
Dust: Environmental impact, 479–489

Ebersole, J. J. (Short-term vegetation recovery at an Alaskan Arctic Coastal Plain site), 443–450
Ecohydrology, 414–424
Ecology. *See also* topics
Ecology: Alpine vegetation, 1–10; Floristic structure, 195–201; Foraging, 313–320; Habitat use, 313–320; Mycorrhizae, 11–20; Riparian vegetation, 35–43
Economic development, 351–356
Elliott, C. L., McKendrick, J. D., and Helm, D. (Plant biomass, cover, and survival of species used for stripmine reclamation in south-central Alaska, U.S.A.), 572–577
Energy balance, 53–63, 261–269, 270–278
Environmental gradients, 385–395
Environmental stress in Arctic, 357–365
Equilibrium-line altitude, 127–134
Everett, K. A. *See* Walker, D. A. and Everett, K. A.
Evolution of arctic plants, 357–365

Fayle, D. C. F. *See* Scott, P. A., et al., 45–51, 175–186
Fen: Freeze-thaw cycle, 289–295
Fertilizer effects, 549–553
Fertilizers, 29–34
Flint, S. D. *See* Barnes, P. W., et al.
Floral distribution patterns, 414–424
Floristic richness: Arctic, 357–365
Floristic structure, 195–201
Ford, J. and Bedford, B. L. (The hydrology of Alaskan Wetlands, U.S.A.: a review), 209–229
Forestation, 526–529
Fossil flora and fauna, 230–241
Fourier series, 270–278
Freeze-thaw, 289–295
Fridriksson, S. (Plant colonization of a volcanic island, Surtsey, Iceland), 425–431
Frost heave, 135–153, 155–166
Frost number, 279–288

Geomorphology: Erosion by snow avalanche, 65–70; Instability, 65–70
Glacial geology: Laurentide Ice Sheet, 81–88; Ungava Peninsula, 109–126
Glacier foreland: Vegetation succession, 385–395
